PROFESSIONAL SUMMARY

Gen AI Full Stack Developer with 7+ years building scalable React/Next.js and Node.js applications, now focused on integrating LLM and RAG features into production. At R Systems and Genaquarios, delivered enterprise systems for Station Casinos serving 50,000+ users — owning features end to end and cutting page loads ~40%. Strong across the React ecosystem, microservice backends, and CI/CD, with a track record of shipping reliable, AI-powered products.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL, PHP

Frontend: React.js, Next.js, Redux, Tailwind CSS, Material UI, Bootstrap, Sass/SCSS, Responsive Design

Backend: Node.js, NestJS, REST APIs, GraphQL, Microservices, MongoDB, MySQL, RabbitMQ

Tools & Practices: Git, Azure DevOps, CI/CD, Jest, Postman, Stoplight, APIM, Agile/Scrum, Code Review

Generative AI: LLM Integration, RAG, Prompt Engineering, AI Feature Development, GitHub Copilot, ChatGPT

PROFESSIONAL EXPERIENCE

Full Stack Developer (Gen AI) — Genaquarios

Remote · Freelancer → Full-time (Feb 2026) · **Oct 2025 – Present**

- Design and ship Generative AI features using LLM and RAG pipelines, automating repetitive workflows and reducing manual effort by ~35%.
- Lead continued development of the Station Casinos Labor System following its migration from R Systems, ensuring uninterrupted functionality and ongoing feature delivery.
- Build and maintain full-stack web applications with React.js, Next.js, and Node.js — creating reusable UI components and integrating REST APIs.
- Design data flows for workforce scheduling and labour-volume tracking, and optimize application performance.

Software Developer — R Systems

Noida, India · **Dec 2021 – Oct 2025**

- Developed scalable, reusable UI components with React.js and Next.js for enterprise casino management systems serving 50,000+ users.
- Cut initial page load by ~40% by implementing Next.js server-side rendering and code-splitting across core dashboards.
- Designed and built backend services and microservices with Node.js and NestJS, reducing average API response times by ~30% through query optimization and caching.
- Implemented authentication, data validation, and API error handling, improving reliability and security across services.
- Established CI/CD pipelines in Azure DevOps to automate build, test, and deployment, shortening release cycles.
- Raised code reliability by writing Jest unit and integration tests (~80% coverage) and enforcing ESLint/Prettier standards.
- Partnered with product managers, designers, and QA in Agile sprints to ship production-ready features.

Front End Developer — K-12 Learning Solutions

Remote · **Feb 2021 – Nov 2021**

- Built responsive user interfaces with React.js, HTML5, CSS3, and JavaScript using a reusable component architecture.
- Implemented dynamic data rendering and REST API integration, and optimized React rendering to improve performance and UX.
- Ensured cross-browser compatibility and responsive design across devices in collaboration with backend developers.

Junior Front End Developer — Virtual Employee

Noida, India · **Mar 2019 – Jan 2021**

- Developed responsive front-end layouts from design mockups using HTML, CSS, JavaScript, and SCSS.
- Customized WordPress themes and built dynamic content pages with PHP, and managed source code with Git.
- Improved page stability and performance through manual testing and JavaScript optimization across browsers and devices.

KEY PROJECT

Station Casinos — Labor System (R Systems → Genaquarios)

- Enterprise workforce-management platform serving 50,000+ users, handling team availability, schedule creation, and labour-volume tracking, built with React.js, Next.js, Node.js, and NestJS on a microservice architecture.
- Owned frontend and backend features end to end and ensured seamless continuity through an inter-company migration.

EDUCATION

Bachelor of Technology, Computer Science — Uttarakhand Technical University (UTU)

Dehradun, India · 2013 – 2017
