

# ABHISHEK KUMAR

Full Stack developer

myselfabhishekthakur@gmail.com | +918126902247

Ghaziabad, UP 201002

**LinkedIn:** <https://www.linkedin.com/in/abhishek-thakur-114846>

## PROFESSIONAL SUMMARY

Software Developer with **6+ years of experience in building scalable web applications**, with strong expertise in **React.js, Next.js, and modern frontend architecture**. Experienced in developing high-performance UI components and integrating them with robust backend services built using **Node.js and Nests.JS**. Previously worked at **R Systems- Genaquarios**, contributing to the **Station Casinos**, where I spent **almost 4 years building enterprise-grade frontend applications and backend APIs**.

Skilled in the **React ecosystem, API integrations, performance optimization, and microservice-based backend development**. Experienced in working in **Agile teams**, collaborating with designers, backend engineers, and product stakeholders to deliver reliable and scalable solutions.

## SKILLS

Java script

Next.js

MongoDB

Version control strategies

Visual Studios

Azure

APIM

Msql

Bootstarp

RabbitMQ

Material UI

GraphQL

GEN AI

React JS

NestJS

RESTful services

Node JS

Postman

Stoplight

Jest

Sass/Scss

Material UI/ Core  
UI

ChatGPT/Copilot

Tailwind

API integration

LLM/RAG

## WORK HISTORY

**Full Stack Developer (Gen AI) Genaquarios**

10/2025 – 03/2026

(Freelancer → Full-time from Feb 2026)

**Responsibilities:**

- **Contributed to the transition and continuation of the Station Casinos Labor System project after migration from R Systems to Genaquarios, ensuring smooth system functionality and ongoing feature development.**
- **Worked on the Labor System module to manage team availability, schedule creation, and labour data volume tracking** for workforce planning.
- **Developing web applications using React.js and Next.js.**
- **Building reusable UI components and optimizing application performance.**

- Integrating **REST APIs** with frontend applications.
- Exploring **Generative AI tools** and integrating AI-based features in applications.

## **Software Developer | R Systems - Noida, India**

*12/2021 -10/2025*

### **Teams Size-6**

Self-driven Software Developer with end-to-end ownership of feature delivery in a fast-paced, agile environment. Experienced in crafting user-centric frontend, integrating and maintaining backend APIs, and ensuring code reliability through Azure DevOps pipelines and peer reviews.

### **Responsibilities:**

- Developed scalable and reusable UI components using React.js and Next.js for enterprise casino management systems.
- Implemented server-side rendering and optimized page performance using Next.js.
- Integrated frontend modules with backend services using REST APIs.
- Designed and developed backend services using Node.js and NestJS, supporting frontend features and microservices architecture.
- Implemented authentication, data validation, and API error handling in backend services.
- Optimized application performance by improving state management and component rendering strategies in React.
- Worked closely with product managers, designers and QA teams to deliver production-ready features in agile sprints.
- Implemented CI/CD pipelines in Azure DevOps to automate build, testing and deployment processes.
- Participated in code reviews, architecture discussions, and technical design sessions to maintain high code quality.
- Monitor application performance and reliability in production, leverage logging/alerting tools (e.g. Azure Monitor) to proactively address issues.
- Write unit and integration tests Jest, enforce linting/formatting rules (ESLint, Prettier) and maintain comprehensive technical documentation.

## **Front End Developer | K-12 Learning Solutions - Remote**

*02/2021 - 11/2021*

### **Teams Size-12**

### **Responsibilities:**

- Developed responsive user interfaces using React.js, HTML5, CSS3 and JavaScript.
- Built reusable UI components and improved application structure using React component architecture.
- Implemented dynamic data rendering and API integration with React.
- Improved website performance and user experience through optimized React rendering techniques.
- Collaborated with backend developers to integrate REST APIs with React frontend.
- Ensured cross-browser compatibility and responsive design across multiple devices.

- Developed and styled responsive front-end layouts using HTML, CSS, and JavaScript based on wireframes and design specifications
- Collaborated closely with UI designers to translate mockups into interactive, user-friendly web pages, enhancing overall user experience
- Designed and implemented a custom "Island Tourist" website template, showcasing modern layout principles and mobile-first design using pure HTML and CSS
- Integrated WordPress themes and customized front-end elements using PHP to create dynamic content pages and blog layouts
- Built reusable UI layouts and implemented modern JavaScript based frontend logic.
- Converted design mockups into functional interfaces using component-based architecture.
- Customized WordPress themes and integrated frontend functionality using PHP and JavaScript.
- Improved page performance by optimizing JavaScript execution and SCSS styling.
- Performed manual testing and debugging to identify across multiple browsers and devices, significantly improving page stability and performance
- Applied version control using Git, managing source code history and collaborating with developers on shared repositories

## EDUCATION

UTU - Dehradun, India    01/2013 - 09/2017

**Bachelor of Technology:** Computer Science
